ARPIT KHAMESHRA

DevOps Engineer | Cloud Infrastructure | CI/CD | IaC

+91-9785863017 | arpitkhameshara164@gmail.com | linkedin.com/in/arpit-khameshra

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 1+ year of experience designing and maintaining scalable cloud infrastructure on AWS, automating CI/CD pipelines, and containerizing applications using Docker and Kubernetes. Delivered a 40% reduction in deployment time and a 25% improvement in application availability through infrastructure automation and cloud optimization. Proficient in Infrastructure as Code (IaC) with Terraform and Ansible, and experienced in implementing observability solutions using Prometheus, Grafana, and OpenTelemetry.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, ECS, EKS, RDS, S3, VPC, Route 53, Lambda, CloudFront, ELB, Lightsail, ECR, SNS, SQS, IAM, Event Bridge), GCP (Compute Engine, Networking, Cloud SQL, IAM)

Containerization & Orchestration: Docker, Kubernetes, AWS ECS, AWS ECR

CI/CD & Version Control: GitHub Actions, Jenkins, Git, GitHub

IaC & Configuration Management: Terraform, Ansible

Monitoring & Observability: AWS CloudWatch, Prometheus, Grafana, OpenTelemetry, SigNoz

Web Servers & Databases: Nginx, Apache, MySQL, PostgreSQL, Redis

Scripting & OS: Shell Scripting (Bash), Linux (Ubuntu, CentOS, RHEL), Windows

PROFESSIONAL EXPERIENCE

Webledger Solution Pvt. Ltd — Jaipur, India

DevOps Engineer — *Aug 2025 – Present*

- Architected and deployed highly available, fault-tolerant infrastructure on AWS ECS with Application Load Balancer (ELB) and RDS Multi-AZ, achieving 99.9% uptime for large-scale production applications.
- Designed and fine-tuned CI/CD pipelines using GitHub Actions, reducing average deployment time by 40% and eliminating manual release steps across 5+ microservices.
- Integrated AWS CloudFront CDN with Route 53 DNS routing, improving application availability by 30% and reducing end-user latency by 25% globally.
- Managed containerized workloads using Docker, AWS ECR, and Kubernetes with namespace isolation and RBAC security policies, supporting 10+ containerized services.
- Implemented centralized observability stack using AWS CloudWatch, OpenTelemetry, and SNS alerting, reducing mean time to detection (MTTD) for incidents by 35%.

Tetari Innovations — Bhilwara, India

DevOps Engineer — *Jan 2025 – Aug 2025*

- Provisioned and oversaw AWS cloud infrastructure including EC2 instances, S3 buckets, and IAM roles and policies, ensuring least-privilege access controls across all environments.
- Configured and maintained Apache and Nginx web servers alongside MySQL and PostgreSQL databases for production web applications serving 1,000+ daily active users.
- Built end-to-end CI/CD pipelines using GitHub Actions and Docker for Django and Node.js applications deployed on AWS, reducing release cycle time by 30%.
- Containerized applications with Docker and orchestrated workloads on Kubernetes, improving deployment consistency and reducing environment-specific bugs by 50%.
- Authored internal documentation and runbooks for infrastructure provisioning processes, cutting onboarding time for new team members by 20%.

KEY PROJECTS

Office and Books Products – Multi-Product Deployment Automation

- Systematized frontend static asset delivery using GitHub Actions, AWS S3, and CloudFront, achieving sub-2-minute deployment cycles and 99.95% CDN availability.
- Configured backend deployments on AWS ECS (Fargate) with streamlined Docker image builds via ECR, reducing image build and push time by 45%.
- Standardized deployment pipelines across 3+ product lines, reducing release-related errors by 40% and enabling zero-downtime deployments.
- Integrated Amazon RDS for relational databases and Amazon EFS for shared persistent storage, supporting stateful workloads across ECS tasks.

Website Management on AWS Lightsail

- Supervised Node.js and static websites on AWS Lightsail, maintaining 99.9% uptime across 4 production instances with enhanced CPU and memory utilization.
- Orchestrated deployment workflows using Git and GitHub Actions, ensuring consistent, repeatable releases with full rollback capability.
- Right-sized Lightsail instance configurations based on traffic metrics, reducing monthly infrastructure costs by 20%.

Scalable Application CI/CD Pipeline – Jenkins & AWS EKS

- Implemented a full end-to-end DevOps automation pipeline for a multi-tier full-stack application using Jenkins, Docker, and Kubernetes on AWS EKS.
- Orchestrated Kubernetes pods across auto-scaling AWS EKS node groups, improving application uptime to 99%+ and supporting 3x traffic spikes without degradation.
- Secured container images using Docker private registries and AWS Secrets Manager for secret injection, eliminating hardcoded credentials across all services.

EDUCATION

B.Tech – Electrical Engineering *Graduation: June 2017*

Arya College of Engineering and IT, Rajasthan Technical University, Kota | GPA: 6.9/10
